EDUCATION

I.M.Sc. — Cyber Security & Forensic Science

Gujarat University
2024 – Present | Gujarat, India

•Network security, digital forensics, ethical hacking, cryptography.

•Bridging academics with hands-on labs and industry certifications.

LANGUAGES

- English
- Hindi
- Gujarati

CAREER OBJECTIVE

Fiercely passionate Cybersecurity and Cloud Security student at Gujarat University, pursuing I.M.Sc. in Cyber Security & Forensic Science. I approach every challenge like an attacker and think like a defender — building skills to architect resilient, intelligent digital infrastructures that stay a step ahead of every evolving threat.

PROJECTS

Web Vulnerability Scanner
Python |XSS/SQLi | Web Security| Ongoing
•Multi-phase scanner built from scratch detecting XSS, SQL injection, and beyond.
•Progressing from basic to enterprise-grade with automated scanning and reporting.

Active Directory Attack Lab
Windows Server |VMware | Active Directory |Complete
•Full enterprise AD environment with Domain Controller, Group Policy, and user accounts.
•Simulated privilege escalation, credential access, and lateral movement systematically.

Brute Force Login Simulator
Python | Auth Testing| Networking |Academic
•Designed controlled brute-force simulation exposing authentication weaknesses.
•Covered password attacks, login bypass testing, and security gap analysis.

Firewall Rules Management Tool
Python | Networking| Rule Validation |Complete
•Custom firewall rules engine to create, manage, and simulate Allow/Deny rules.
•Supports traffic filtering simulation based on IP, port, and protocol.

CERTIFICATIONS

Foundations of Cybersecurity
Google / Coursera
• May 2025

Cybersecurity Analyst Job Simulation
Tata Group / Forage
•November 2025

AWS Security Fundamentals
Amazon Web Services
•March 2026

HIGHLIGHTS

•5+ Hands-on Projects
•3 Industry Certifications
•CTF Challenger — PicoCTF
•Personal Kali Linux Lab
Available for Internships

TECHNICALSKILLS

- Pentesting: Kali Linux, Burp Suite, Nmap, Metasploit
- Cloud: AWS IAM, Security Groups, Cloud Security
- Forensics: Ghidra, Cutter, Memory Analysis
- Network: Wireshark, Active Directory, Firewall
- OSINT: Passive/Active Recon, Footprinting
- Dev: Python, Bash
- Web: XSS, SQLi, Web Exploitation

EXPERIENCE

Cybersecurity & Cloud Practitioner

•Architected and operated a personal cybersecurity lab on Kali Linux simulating real attack & defense scenarios.
•Conducted vulnerability analysis and penetration tests using professional methodologies.
•Developed original security tools — web vulnerability scanner and firewall rules engine — using Python.
•Built Active Directory labs simulating enterprise-level attacks including privilege escalation and lateral movement.
